Resolution 18-01

A RESOLUTION OF THE COUNTY COMMISSION OF HAMBLEN COUNTY, TENNESSEE AUTHORIZING A SPECIAL LITTER GRANT APPLICATION

Resolution authorizing submission of an application for a Special Litter Grant focusing on communitybased litter prevention projects from the Tennessee Department of Transportation and authorizing the acceptance of said grant.

Whereas, the Hamblen County Commission intends to apply for the aforementioned grant from the Tennessee Department of Transportation, and

Whereas, the contract related to the aforementioned grant effective July 1, 2018 thru June 30, 2020 will impose certain legal obligations upon Hamblen County.

Now, therefore, be it resolved:

- 1. That Bill Brittain, County Mayor of Hamblen County, is hereby authorized to apply on behalf of Hamblen County for a Special Litter Grant focusing on community-based litter prevention projects from the Tennessee Department of Transportation.
- 2. That should said application be approved by the Tennessee Department of Transportation, then Bill Brittain of Hamblen County is authorized to execute contracts or other necessary documents, which may be required to signify acceptance of the Special Litter Grant focusing on community-based litter prevention projects by Hamblen County.

Approved at the regular meeting held on the 18th day of January, 2018.

Re: Special Litter Grant for Community-Based Litter Prevention Projects Resolution

The Tennessee Department of Transportation is currently offering a special litter grant for community-based litter prevention projects. This is a two-year grant to help counties fund one-time projects or kick-start a new community service. Awarded amounts will be between \$20,000 and \$200,000. There is no local match. I am asking for approval to apply for the grant.

Bill Brittain, County Mayor

From: Bill Brittain, County Mayor

Date: January 2, 2018

Re: Selection of Pharmacy Benefit Manager

The next step of our strategic plan to improve Hamblen County's self-insured health insurance plan is to separate the management of our pharmacy benefit from the medical claims. Our pharmacy claims totaled \$770,882 in 2017.

In partnership with Belva Hale of Sherrill Morgan (our broker/consultant for health insurance), the Mayor's office has interviewed three companies and is recommending MedBen of Newark, Ohio to manage our pharmacy benefit. We anticipate significant savings from this move with minimal impact on county employees and their families.

I am requesting the County Commission to approve awarding the pharmacy benefit management contract to MedBen of Newark, Ohio.

Do not hesitate to call me with any questions.

Bill Brittain, County Mayor

Resolution 18-02

A RESOLUTION OF THE COUNTY COMMISSION OF HAMBLEN COUNTY, TENNESSEE AUTHORIZING THE SUBMITTAL OF A PROPOSAL FOR A TMHSAS ALTERNATIVE TRANSPORTATION PILOT PROJECT

WHEREAS, the Hamblen County Commission recognizes the number and cost of transporting mental health patients involuntarily committed to psychiatric hospitals has grown substantially during the past few years; and

WHEREAS, the county sheriff's department is the agency solely responsible for transporting these patients to the psychiatric facilities under state law; and

WHEREAS, the Tennessee Department of Mental Health and Substance Abuse Services is trying to address the problem by appropriating \$ 1 million for Alternative Transportation Pilot Projects to identify new, innovative ways to transport mental health patients that reduce the stigma surrounding involuntary hospitalization by decriminalizing the transport of individuals to mental health hospitals; and

WHEREAS, Hamblen County is one of only six counties that qualify to apply for the pilot projects because it is a partner with Helen Ross McNabb Centers in the TMHSAS Pre-Arrest Diversion Grant Program; and

WHEREAS, Hamblen County is committed to provide the necessary funds and/or in-kind services which will be used to satisfy the twenty-five percent (25%) funding match required by TMHSAS;

NOW, THEREFORE, BE IT RESOLVED, that the Hamblen County Commission hereby authorizes the County Mayor or his representative(s) to submit a proposal for the TMHSAS Alternative Transportation Pilot Project. The proposal will request funding of not more than \$176,000 with 25% of the total project cost to be matched by Hamblen County. If awarded the project, Hamblen County will meet the deadlines outlined in the grant contract.

WHEREFORE, it was moved by _ this Resolution be adopted.	R. Debord	nd seconded by <u>H. Sh. pley</u> that
^	Voting Nay:	Pass: <u>YES</u>

The Chair declared the Resolution adopted this 18th day of January, 2018.

Hamblen County Board of Commissioners

Bv: Louis "Doe" Jarvis, Chairman APPROVED Bv: **Bill Brittain** Hamblen County Mayor

ATTES1

Hamblen County Clerk

To: Finance Committee Hamblen County Commission

From: Bill Brittain, County Mayor

Date: January 2, 2018

Re: Alternative Transportation Pilot Project

The cost of transporting patients from local hospitals and county jails to and from mental health hospitals is one of the fastest growing areas of the sheriff's department budgets statewide. In response to the concerns voiced by county sheriffs, the Tennessee Department of Mental Health and Substance Abuse has issued an RFP for funding of alternative transportation pilot projects for mental health patients.

Hamblen County is one of only six jurisdictions that qualify for the 2018 grant that offers \$333,333 funding for East Tennessee with a 25% cash match. I am asking for permission from the County Commission to apply for the grant. I anticipate using funds we already use for mental health transports as our match.

Do not hesitate to call me with any questions.

Bill Brittain. County Mayor

To: Finance Committee Hamblen County Commission

From: Bill Brittain, Hamblen County Mayor

Date: January 2, 2018

Re:

Transfer from Sanitation Capital Projects Fund (#173) to Capital Projects Fund (#171)

Several years ago, TDEC required Hamblen County to repair the cap of its old landfill site on Neblett Road. The repair work was completed in 2014 and TDEC told me last week that it is ready to begin the process to remove the site from the state's superfund list. Once it is removed from the list, the County will only be responsible for minor maintenance to the property.

There is a balance of \$78,316.72 in the Sanitation Capital Projects Fund (#173) from the repair project. I am asking the Finance Committee to recommend to the full County Commission that we keep \$25,000 in the fund to pay for future repairs to the property and move \$53,316.72 to the Capital Projects Fund (#171) to finance future projects.

Do not hesitate to call me with any questions or concerns.

TO: Doe Jarvis Budget Committee Chair FROM: Bill Brittain, County Mayor

RE: Fiscal Year 2018-2019 Preliminary Budget Plan of Action

I present the following preliminary plan of action for the upcoming FY 2018-2019 Budget Plan and look forward to working with the Budget Committee, elected officials, and department heads to develop a budget that will allow us to meet the needs of Hamblen County taxpayers in an efficient manner.

As in previous years, it is my plan to present to you the budget in its totality; and the goal is to pass a budget by June 30, 2018. I encourage you to please contact me if you have questions or need additional explanations. Please keep in mind that the budget process is a fluid process.

Budget worksheets will be prepared and remitted to the elected officials and department heads during the first week in February 2018. Meetings will be held with the elected officials/department heads on an individual basis during March 2018 to discuss the specifics of the budget. If a SPECIAL REQUEST exists, it is to be discussed during the individual meetings, and a request by memo is to be submitted to the Finance Department. Based on the nature of the special requests, the elected official/department head may be required to appear before the Budget Committee for explanation. The Finance Director will manage the agendas of the Budget Committee to allow elected officials/department heads to be heard should the need to do so arise.

We are scheduling the large courtroom as usual for May & June on Tuesdays and Thursdays at 4:00 PM. Please see the attached Preliminary Budget Plan of Action for the anticipated meetings and corresponding agendas. All of these dates may not be required. We will meet on an as-needed basis as determined by you, the County Commission Chairman.

I look forward to working together, so that we can and will prepare a budget that meets the needs of the citizens.

Bill Brittain, County Mayor

MEMORANDUM

TO:	Mayor Bill Brittain, Administrator Tony Cox, Director Hugh Clement
FROM:	Chris Bell, Director
DATE:	4 December 2017
DE-	Hemblen County Hezard Mitigation Plan
RE: CC:	Hamblen County Hazard Mitigation Plan

I have attached the updated and FEMA approved Hamblen Hazard Mitigation Plan to this email. Hamblen County, the City of Morristown, and Hamblen County School System are all three listed as jurisdictions in the plan. The plan allows for counties that have an approved plan to apply for Hazard Mitigation Grant funds when they are available. It also is a critical component in our mitigation practices to assess projects that could mitigation areas that could be impacted by a larger natural threat. A final component is that the plan aids in a jurisdiction being considered for higher percentages for reimbursement in a large scale event in which a disaster declaration is declared.

Our final step in the process is for adoption by all three jurisdiction's governing bodies. If you would place this item on your next scheduled governing body agenda and inform me as to what the date and time will be, I will attend and present the document for adoption.

I have attached the plan and the letter from FEMA for your records and the presentation to the governing bodies.

If you need any additional information, please contact the EMA office.

November 30, 2017

Mr. Doug Worden State Hazard Mitigation Officer Tennessee Emergency Management Agency 3041 Sidco Drive Nashville, Tennessee 37204

Reference: Multi-jurisdictional Hazard Mitigation Plan: Hamblen County

Dear Mr. Worden:

This is to confirm that we have completed a Federal review of the draft Hamblen County Multijurisdictional Hazard Mitigation Plan for compliance with the Federal hazard mitigation planning requirements contained in 44 CFR 201.6(b)-(d). Based on our review and comments, Hamblen County Hazard Mitigation Planning Committee developed and submitted all the necessary revisions. Our staff has reviewed and approved these revisions.

We have determined that the revised Hamblen County Hazard Mitigation Plan is now compliant with Federal requirements, subject to formal community adoption. Upon submittal of a copy of documentation of the adoption resolution(s) to our office, we will issue formal approval of the Hamblen County Hazard Mitigation Plan.

Please have the Hamblen County Hazard Mitigation Planning Committee submit a final copy of their Plan, without draft notations and track changes.

For further information, please do not hesitate to contact Valerie Anderson, of the Hazard Mitigation Assistance Branch, at (770) 220-5661 or Darlene Booker, of my staff, at (770) 220-5404.

Sincerely,

Kriste Martinge

Executive Summary

Over the past three decades, hazard mitigation has gained increased national attention due to the large number of natural disasters that have occurred throughout the U.S. and the rapid rise in costs associated with those disaster recoveries. It has become apparent that money spent mitigating potential impacts of a disaster event can result in substantial savings of life and property. With these benefit cost ratios being extremely advantageous, the Disaster Mitigation Act of 2000 was developed as U.S. Federal legislation that reinforces the importance of pre-disaster mitigation planning by calling for local governments to develop mitigation plans (44 CFR 201).

The purpose of a local hazard mitigation plan is to identify the community's notable risks and specific vulnerabilities, and then to create/implement corresponding mitigation projects to address those areas of concern. This methodology helps reduce human, environmental, and economical costs from natural and man-made hazards through the creation of long-term mitigation initiatives.

The advantages of developing a local hazard mitigation plan are numerous including improved post-disaster decision making, education on mitigation approaches, an organizational method for prioritizing mitigation projects, etc. It has been noted that communities who successful complete and maintain a mitigation plan receive larger amounts of Federal and State funding to be used on mitigation projects, and receive these funds faster, than communities who do not have a plan. Such funding sources that the plan caters to are Pre-Disaster Mitigation, Flood Mitigation Assistance, Severe Repetitive Loss, and Hazard Mitigation Grant Programs.

The 2016 update of the Hamblen County Hazard Mitigation Plan was created to act as a well thought-out guide to be used by, and for, the people of Hamblen County. For this plan to be successful, each jurisdiction within the county participated in the drafting and preparation of the plan. These participating jurisdictions include:

- Hamblen County (unincorporated)
- City of Morristown
- Hamblen County School Board

In reference to federal code title 44 CFR 201, the plan is required to be submitted to both TEMA (State) and FEMA (Federal) for review to be approved. When the plan is deemed "approval pending adoption" by FEMA

Hamblen County Hazard Mitigation Plan October 30, 2017 p. 1 January 18, 2018 Retu .

(44 CFR 201.6(c)5), each of the participating jurisdictions will adopt the plan through a local resolution.

Every 5 years the plan is required to be updated and revised in regards to maps, vulnerability assessments, tables, information, and projects. This is the updated plan that the committee met in August of 2016 and submitted to TEMA in October 2016. After recommendations from TEMA Planning, additional revisions and updates were made to the plan and resubmitted to TEMA in April 2017.

Section 1: Planning Process

Planning Process

The previous Hamblen County Hazard Mitigation Plan was approved by FEMA on March 20, 2012. Per federal requirements stated in 44 CFR 201, all local hazard mitigation plans are required to go through a FEMA update review every 5 years to remain eligible for hazard mitigation grants. This update methodology was developed to assure that local governments are continuing to re-evaluate their risks and to regularly implement mitigation projects that can reduce community vulnerabilities.

The beginning of the plan's five year update process took place at a meeting on October 8th, 2013 (See <u>Appendix 1</u> for the meeting's attendance sheet). At this meeting Hamblen County Emergency Management Agency stated that they would continue the role of leading staff and interested persons in updating their mitigation plan. The tasks to be undertaken by Hamblen County Emergency Management Agency consisted of continuing to get agencies and the public involved in the county's mitigation efforts, performing the written plan's required 5-year update, and soliciting for new mitigation actions/projects to be added to the plan. On October 9, 2014 the Hamblen County Hazard Mitigation Committee met again (see <u>Appendix 2</u> for meeting attendance sheet and minutes). On August 11, 2016 the committee met again to approve all plan updates, revisions and the new project list (see <u>Appendix 3</u> for attendance sheet and meeting minutes).

At each of these meetings, Hamblen County continued to have a countywide hazard mitigation committee. Realizing that a successful mitigation committee includes a number of representatives, specialists, and individuals who can give valuable/unique insights that local emergency management staff may not have considered; invites to be a part of this committee were sent by email with link attached to view the document on our website included open invitation to elected officials, county and city staff, representatives of the jurisdictions, neighboring counties, local businesses, state agencies, private organizations, academia, non-profits, and other noticeable persons. This was done after the final draft was received back from TEMA.

Within this committee all three jurisdictions are participants, as well as a cross-section of other representatives. The Hamblen County Hazard Mitigation Committee consists of the following members:

Member	Title	Representation
Chris Bell (Current Chair)	Director	Hamblen County EMA
Clark Taylor	Deputy Chief	Morristown Fire Department
Paul Brown	Director	Morristown Public Works
Keith Ely	Assessor of Property	Property Assessor
Tina Whitaker	Department Manager	Hamblen Planning Department
Danny Houseright	Director	Morristown/Hamblen EMS
Billy Gulley	Lieutenant	Morristown Police Department
Hugh Clement	Assistant Director	Hamblen County Schools
Eric Carpenter	Director	Hamblen 911
Don Ellison	Training Officer	Hamblen County EMA
Tim Greene	Deputy Chief Training Officer	Morristown Fire Department
Charles Southerland	Safety and Planning	Morristown Utility
Dale Griffie	Deputy Director	Hamblen County EMA
Barry Poole	Road Superintendent	Hamblen County Road
		Department
Daniel Singleton	Operations District	TDOT, Morristown
	Supervisor	
Anthony Cavallucci	Warning Meteorologist	NWS, Morristown

The Hamblen County Hazard Mitigation Committee is the county's lead in all mitigation efforts and in the development of the county's mitigation plan. The committee member's efforts in the plan update were broken down into five stages: **1**) analysis of the original plan (*the plan as it stood prior to the updates*), **2**) updating of the plan, **3**) public participation, **4**) review of the final updated plan, and **5**) adoption of the plan.

Stage 1: During the analysis of the plan, Hamblen County Emergency Management Agency reviewed the original county plan and made notes on what sections would require the main updates. Hamblen County Emergency Management Agency suggested that the three core areas for needed updates were in the risk/vulnerability assessment, localized flood prone areas for mitigation actions, and in the restructuring of the county's listed hazard mitigation projects.

Stage 2: From there the committee started making the updates to the plan. A large amount of this effort took place at the second Hamblen County Hazard Mitigation Committee meeting that was held on October 9th 2014. Tasks included re-evaluating the plan's hazards, re-assessing their risks, re-calculating each jurisdiction's vulnerable areas, re-establishing the county's mitigation goals, examine the status of mitigation projects listed in the original plan, update the county's mitigation projects listed and to prioritize the projects listed, and set another date to finalize any remaining business needs for the plan. TEMA, East Planning personnel Bart Hose, was present at this meeting to

(

6

answer mitigation planning and grant questions. **Appendix 2** provides a copy of the meeting's attendance sheet and minutes.

The committee next met on August 11th, 2016, to finalize the county's mitigation project chart, prioritize the projects listed, and conduct a final review of the hazard mitigation plan prior to submission to FEMA. **Appendix 3** provides a copy of the meeting's attendance sheet and minutes.

<u>Appendix 4</u> details a year by year summary of actions involving the Hazard Mitigation Plan.

Stage 3: To encourage public involvement, the Hamblen County Hazard Mitigation Committee held a meeting for public comment with a public notice. **Appendix 5** presents a copy of the public notice. There was no public feedback.

<u>Stage 4</u>: Next the committee evaluated the written updates of the plan against FEMA's crosswalk requirements via email correspondence.

Stage 5: Upon receiving the "Approval Pending Adoption" designation from FEMA, the public will be given a chance to comment on the final draft of the plan prior to its adoption by each local jurisdiction. This opportunity will take place at a local board meeting for each jurisdiction before the plan adoption decision takes place. The opportunity for final public comment will therefore be documented through the receipt of a signed adoption resolution.

Review of Existing Information

A preliminary review of existing plans, reports, and information was conducted during the initial phase of creating the Hamblen County Hazard Mitigation Plan. The primary purpose of reviewing this information was to identifying local hazards, recognizing local risks, and understanding different local vulnerabilities. The following list of sources identifies some of the existing studies that were reviewed:

- State of Tennessee Hazard Mitigation Plan
- Tennessee Emergency Management Plan (TEMP)
- U.S. Census Bureau
- FEMA Mitigation "How to" Guides
- NOAA National Climatic Data Center (NCDC) storm reports
- City of Morristown Land Use Plan
- Hamblen County Land Use Plan
- Hamblen County Building/Zoning Codes
- Hamblen County BEOP
 Hamblen County Hazard Mitigation Plan October 30, 2017

and a substantial statistic of the activity of the substantial statistic statistics and the substantial substan

anya wa danahiri shi ci ci mamanana masa asa asa anasa ay siya ci ci ci ci ay

Hamblen County Schools Strategic Plan

All of the listed plans, studies, and data sources were incorporated into the Hamblen County Hazard Mitigation Plan. These sources developed the plan's hazard, risk, and vulnerability assessment sections that in return led to the establishment of meaningful mitigation actions.

Updates within the Plan

It is important to note that this countywide plan was reorganized and updated from the original Hamblen County Hazard Mitigation Plan. Hamblen County reviewed and analyzed each section of the original plan and made updates in the following ways:

Section 1: Planning Process

Hamblen County updated the original plan's description of the planning process to include the new or no longer participating committee members, the countywide mitigation meetings that took place for the plan's update, and the latest opportunity for the public to get involved. Hamblen County also compiled a new list of existing documents that they reviewed in updating their sections in the plan.

Section 2: County Profile

Hamblen County created a new development trends section in this plan update.

Section 3: Risk Assessment

Hamblen County kept all of their listed natural hazards from the original hazard mitigation plan.

As part of the plan update, Hamblen County updated their previous occurrence hazard listings to cover the most recent five years (if data was available) and re-evaluated each hazard's extent, probability, and potential impacts. Also, the plan updated the HAZUS-flood model study and simplified countywide floodplain maps for the first time, as seen in the plan's appendices.

Section 4: Mitigation Strategy

Hamblen County has updated their mitigation goals to address a more realistic view based on access to funds both locally and through grants. Hamblen County also has brainstormed some new mitigation projects that were added to the list, used a new chart method to profile project details, and developed a system to describe where their previous plan's projects are in terms of being implemented.

(:

Section 5: Plan Maintenance

Hamblen County will continue to work with the other jurisdictions in monitoring, evaluating, and updating the plan; provided an updated list of mechanisms they could incorporate mitigation within; stated that now the Hamblen County BEOP has mitigation concepts incorporated into it; and will continue to strive to achieve the goals and projects within the plan by each jurisdiction.

Section 2: County Profile

Development Trends

Hamblen County and its jurisdictions can be found in East Tennessee. It is bordered by the Grainger County to the northwest, Hawkins County to the northeast, Greene County to the East, Cocke County to the southeast, and Jefferson County to the southwest. It has a population of 63,074 (2013). Hamblen County was named in honor of Hezekiah Hamblen (1775–1854), an early settler, landowner, attorney, and member of the Hawkins County Court for many years. Governor Dewitt Clinton Senter, a resident of the county, used his influence to assist in its establishment. The county has a total area of 176 square miles, of which 161 square miles is land and 15 square miles is water.

The incorporated jurisdictions have populations as follows (2010 census):

Jurisdiction	Population
Morristown	29,137

Morristown is the focal point for medical services, dining, and entertainment, with 3 major industrial parks all located within the city boundaries. There is a moderate agricultural base. Hamblen County is centrally located to all major U.S. markets with transportation access via 3 state routes. Historical sites and tourism are also a critical component of the development and expansion of Morristown and Hamblen County.

Due to current land use trends, the Hamblen County Property Assessor predicts future growth in residential, commercial, and industry. There are no immediately anticipated flooding problems from the residential expansion. During the past several years, both retail and commercial growth have been expanding rapidly. Some of this growth is attributed to new transportation projects being completed to add more options for access to Morristown. Most of the commercial development has been focused in the western part of the city/county and also on highway 25E near exit 8 in the southern part of the county. The central part of the city has also seen redevelopment of existing sites. Along with this, storm water plans have continued to be updated and followed for infrastructure build-out.

Commercial growth and development in Morristown has increased and has trended towards the west in the recent years. Residential development has been more evenly distributed and more muted. The City's storm water ordinance requires storm water peak flow control for

The second s

we approximate a second s

The contract department of the part of the contract of the second second

new development so that runoff after development does not exceed the runoff prior to development. This growth has not significantly affected the City's storm water plan. This control is typically provided by detention ponds or other storage methods. These facilities must be designed by state-licensed engineers and are reviewed by a licensed engineer on behalf of the City. Since the control is provided at each site as new development occurs, no significant upgrades to the City's infrastructure have been required.

Legal & Regulatory Capability

The following chart indicates the legal and regulatory adherence of each of the jurisdictions within Hamblen County:

Regulatory Tools/Plans	Regulatory Type: Ordinance Resolution Codes Plans, Etc.	Hamblen County	Morristown
Building Codes Zoning	Municipal Code Municipal Code	ir Y	Y Y
Emergency Response Plan	Basic Emergency Operations Plan (BEOP)	YL	Y
National Flood Insurance Program Participant Post-Disaster Recovery Plan	веор	Y Y	Y Y

Section 3: Risk Assessment

Hazard Identification

To begin to assess Hamblen County's risk to natural hazards and identify the community's areas of highest vulnerability, the mitigation committee had to identify which hazards have or could impact the county. This hazard identification process began with researching previous hazard events that have occurred in Hamblen County by going through newspaper articles, Hamblen County Emergency Management records, and recalling personal experiences. From there Emergency Management staff also analyzed hazard events that could occur in the county by reviewing scientific studies and the State of Tennessee Hazard Mitigation Plan. The following hazards have been identified as hazards of concern by the Hamblen County mitigation committee during the update process.

Flooding

Flooding events occur when excess water from rivers and other bodies of water overflow onto riverbanks and adjacent floodplains. In addition, lower lying regions can collect water from rainfall and poorly drained land can accumulate rainfall through ponding on the surface. Floods in Hamblen County are usually caused by rainfall, but may also be caused by snowmelt and man-made incidents. The below charts explain common ways flooding occurs and common factors that contribute toward the severity of floods.

	Common Ways Flooding Occurs
Methods	Description
Overland Flow (a) Infiltration (b) Saturation	-Excess overland flow occurs when soil spaces are so full of water that no more rain can be absorbed.
Throughflow	-Rainwater which has infiltrated into unsaturated soil can move horizontally to the river channel. This process is slower than overland flow but faster than baseflow.
Baseflow	 -Rainwater which has percolated to the aquifer can seep into the river channel. This is the slowest process.

Source: The Field Studies Council

A rate is

	Common Causes of Flooding
Factor	Effect on Flooding
Geology	Impermeable rocks are saturated more quickly than porous and pervious rocks. Saturation-
	excess overland flow is more common. Sandy soils have larger pore spaces than clay soils.
	Infiltration is most rapid in sandy soils.
Relief	Water reaches the channel more rapidly in a steeper basin as water is travelling more quickly
	downhill.
Vegetation 👘	Vegetation intercepts a large proportion of rainfall. Where trees are deciduous, discharge is
or the state of the	higher in a forested basin in winter as there is less interception.
Meteorological	Where rain is falling faster than the infiltration rate there is infiltration-excess overland flow.
Factors	This is common after a summer storm. Snow does not reach the channel but is stored on the
	ground surface. As snow melts, the meltwater will reach the channel quickly as infiltration is
	impeded if the ground is still frozen.
Catchment	It takes less time for water to reach the channel in a circular basin as all extremities are
Shape ***	roughly equidistant from the channel.
Land Use	Surface runoff is higher in urban areas because there are more urban surfaces (concrete &
	tarmac) and sewers take water rapidly to rivers. There is less interception and
	evapotranspiration and more surface runoff in a deforested catchment.
Catchmenter	Water reaches the channel more rapidly in a smaller basin as water has a shorter distance to
Size Call Rep.	travel.
Antecedentasse	The level of discharge before the storm is called the antecedent discharge. Even a small
conditions	amount of rain can lead to flooding.

Source: The Field Studies Council

In Hamblen County some areas are more flood-prone than others. One of the ways of identifying these flood-prone areas is through determining the county's 100- and 500-year floodplains. 100-year floods are calculated to be the level of flood water expected to be equaled or exceeded every 100 years on average, meaning a flood that has a 1% chance of being equaled or exceeded in magnitude in any single year. A 500-year floodplain has a 0.2% chance. A 100-year floodplain would include the areas adjoining a stream, river, or watercourse that would be covered by water in the event of a 100-year flood (see diagram below).

Characteristics of a Floodplain

Source: FEMA

In Hamblen County, all jurisdictions have 100-year floodplains located within their boundaries and all jurisdictions are susceptible to smaller localized flooding outside of the 100-year floodplains. Areas in the county known to flood more often include:

		Areas Mitigated	
		Professional Profession	
East Morris Blvd	Drainage Project at Flash Flooding Sites	Storm water system reworked for development	July 2016
Intersection of Shinbone Road and Jarrell Road	Road Elevation and Culvert Project	Bridge, culvert rebuilt	November 2015

Flood Events in Hamblen County: January 1994 to May 2016

Flood Impacts in Hamblen County: January 1997 to May 2011

Loreation		Impact Description
Countywide	6/14/1997	Hamblen county EOC reported numerous bridges washed out on backroads in eastern and
,		them, easte of the pounty
Countywide	5/7/1998	Southern parts of the county. Thunderstorms with very heavy rain cause extensive urban and small stream flooding
		throughout the county.
Countywide	7/11/1999	Numerous incidents of minor flooding were reported
Regional	3/17/2002	Widespread flooding occurred across most of East Tennessee. Rainfall totals between five
-		and eight inches were reported in 36 hours. Total damage estimates were calculated to be
		over 5 million dollars.
Regional	2/14/2003	Four day rainfall totals of two to eight inches fell across east Tennessee, with the highest
		amounts occurring across the Cumberland Plateau and adjacent valleys areas. This rainfall combined with a melting snowpack (reports of up to a foot in the higher elevations) to produce
		widespread flooding of rivers and streams with numerous mudslides.
		Widespread flooding of neers and streams with indifferences inconses. With the ground already saturated from the previous week's rainfall, three day rainfall totals of
Countywide	2/21/2003	with the ground already saturated from the previous week's ramain, ince out runnan terms of one to three inches created some flooding of streams and rivers as well as several mudslides
		across east Tennessee.
Countywide	4/10/2003	Seven day rainfall totals (4th through the 10th) of three to five inches were reported across
Countywide	471072003	central east Tennessee and northeast Tennessee, with one to three inches occurring on the
	Í	10th. Several secondary roads across the area were flooded with several rivers experiencing
		some minor flooding
Morristown	9/26/2009	Area flooding occurred along highways 11 east and 25 east in and around Morristown,
		Tennessee. Several inches to nearly a foot of water was over a few of the area roads, with
		several areas briefly impassable due to the flooding.
Morristown	2/28/2011	A NWS employee reported heavy rain from a thunderstorm caused flooding along Panther
		Creek Poad
Morristown	2/28/2011	Mesonet reported 2.26 inches of rain in a 3 hour period from a thunderstorm producing minor
		flooding.

Small localized flood events are likely to occur about every year in Hamblen County. The severity of flooding that may occur in the county is measured by inches of rainfall and by feet of flooding. Based on previous occurrences, in a worse case scenario it is possible for the extent of a flooding event to exceed 9 inches of rainfall and cause over 2 feet of

1.45111

localized flooding in the span of two days. As seen with the May 2010 Tennessee Flood Event (*DR-1909*), it is possible for 20 inches or more of rainfall to amass within two days (see following map).

Tennessee May Flood- Precipitation for May 1st & 2nd 2010

Source: National Weather Service

According to a NOAA Flood Risk Map (see map below), the majority of Tennessee was located in an "above average" risk of flooding zone during spring 2010. This proposed vulnerability is coupled with the fact that on average Tennessee usually acquires over 50-60 inches of rainfall a year (see following map).

Hamblen County uses a ranking system to determine each jurisdiction's vulnerability to flooding events. This system is based off simple arithmetic which analysis's potential impacts to determine vulnerabilities and then analysis's the probability of a flood event occurring to calculate a flood risk ranking for each jurisdiction.

Jurisdiction	Human	Impacts Property		Vulnerability H+P+B=#; #/3=V
Hamblen County Unincorporated	2	3	1	2.00
City of Morristown	1	3	1	1.67

For further information about flooding hazards in Hamblen County, see the HAZUS vulnerability study in *Appendix 5*.

Sinkholes

Both the City of Morristown and Hamblen County have begun to see a rise in the occurrence of sink holes in both jurisdictions in recent years. This has affected our infrastructure, transportation, and our own public works and road departments. There is some possible contemplation that our rapid economic growth in certain areas has just revealed these with our karst geological structure in certain parts of our jurisdiction. Because of the costs and time associated with repairing the sink holes, we would like to try and mitigate through study where we are vulnerable to these sinkholes and if certain areas have the risk to more developing.

* The East Industrial Park sinkhole took 2 years to fix at a cost of \$360,795.52.

The following map was retrieved by the Geologic Hazards Map of Tennessee.

Karst areas (areas with caves, sinkholes and disappearing streams)

Areas with a high density of karst leatures

According to the Geologic Hazards Map of Tennessee, because of the potential for property damage if a structure is located over a cavern, it is imperative to study existing karst features and associated hydrologic conditions during the planning and investigative stages of a construction program. It is believed increased sinkhole activity in the Hamblen County area has increased because of new infrastructure construction. Already stated in this plan is Hamblen County's flood risk. When Hamblen County floods, there is risk to the karst's in the area flooding as well. The flooding of a karst causes an imbalance between surface runoff into the sinkhole and discharge into the underlying cavern system. Consideration must be given, therefore, to the flood history of a depression before a structure is located.

The above chart provided details about Hamblen County's sinkhole history which totals 131 work days to fix the area affected. Significant sinkholes which require repair occur about 3 to 5 times per year, on average. Accurate data on the extent of sinkholes, in units of measurement, is not currently available. Units of measurement are not gathered by those who remediate sinkholes because there is yet to be a standard established in reference to the overall documentation of the issue.

Tornadoes/Severe Storms

According to the National Weather Service, to consider a storm severe it must encompass one of three traits: produce winds greater than 58 miles per hour (50.4 knots), produce hail ³/₄ of an inch or greater in diameter, or produce tornadoes. On average, a typical county in Tennessee has about 10 severe storm watches per year (see map below).

National Weather Service All Severe Weather Re HAIL 9375 • 666 707 # 2:6 WIND 13974 2214 4 -854 860 + 65kt-TOAN 1177 94 • EFO,U 396 • ₽1 EF 2 18 • EF 3 з » EF 4 £85 TOTAL 24527

Average Severe Storm Watches Per Year (1999-2015)

Source: NOAA/NWS Storm Prediction Center

A tornado is a violently rotating column of air that extends from a thunderstorm, etc. down to the ground, and can reach wind speeds of 40 mph to 250 mph and higher. Tornadoes paths, lengths, and widths can vary greatly. In Hamblen County, all jurisdictions are vulnerable to tornado threats. The following map places much of Tennessee in the highest wind zone (see following map).

Hamblen County Hazard Mitigation Plan October 30, 2017

23 January 18, 2018

Even though major tornado events haven't occurred in Hamblen County, tornado risk studies show that it is possible for Hamblen County to receive a tornado every year (see the following map for this probability information).

Average Number of Tornadoes Per Year

Source: Oklahoma Climatological Survey

The severity of tornadoes that may occur in the county is measured using the Enhanced Fujita Scale for tornadoes (see chart below). Based on historical events, in a worse case scenario it is possible for the extent of a tornado to exceed an EF3 ranking.

		Fujita Scale/Enhanced Fujita Scale for Torna	does	11112
F-Scale	Fastest Quarter	Typical Impacts and the second	Enhanced Scale: 3 Sec Wind Gust Speed	- P Scale
FO	40-72 mph	Some damage to chimney; breaks branches off trees; pushes over shallow-rooted trees; damages sign boards.	65-85 mph	, EFO
F1	73-112 mph	Peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed.	86-110 mph	6 F1
F2	113-157 mph	Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated.	111-135 mph	EF2
F3	158-206 mph	Roof and some walls torn off well constructed houses; trains overturned; most trees in forest uprooted.	136-165 mph	EF3
F4	207-260 mph	Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown and large missiles generated.	166-200 mph	
F5	261-318 mph	Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel reinforced concrete structures badly damaged.	Over 200 mph	EF5

Hail is the frozen form of precipitation, falling as small spheres of solid ice. Even though the risk from hail is relatively low, all jurisdictions have the possibility of hail causing some window and roof damage. Historically, hail events occur about once a year in Hamblen County. The severity of hail is measured by the diameter of the hail itself, commonly using the TORRO Hail Index (see following chart). The largest hail event in Hamblen County was recorded in Morristown on May 18, 1995, where tennis ball size hail (H7/2.75 inch) was reported causing window damage to several vehicles.

TORRO Hail Index

			TORRO Hail Index
Scale	Max Diameter	Comparisons	Typical Impacts and a second
HO	5-9mm	Pea	No damage,
H1	10-15mm	Mothball	Slight general damage to plants, crops.
H2	16-20mm	Marble	Significant damage to fruit, crops, vegetation.
на	21-30mm	Walnut	Severe damage to fruit and crops, damage to glass and plastic structures,
1 manual francisco fra		<u> </u>	paint and wood scored.
Н4	31- 4 0mm	Pigeon's Egg	Widespread glass damage, vehicle bodywork damage.
HS	41-50mm	Golf Ball	Wholesale destruction of glass, damage to tiled roofs, significant risk of
		1	injuries.
H6	51-60mm	Hen's Egg	Bodywork of grounded aircraft dented, brick walls pitted.
H7	61-75mm	Tennis Ball	Severe roof damage, risk of serious injuries.
H8		Soft Ball	Severe damage to aircraft bodywork.
H9	91-100mm	Grapefruit	Extensive structural damage. Risk of severe or even fatal injuries to persons
			caught in the open.

Hail Events in Hamblen Count	y: January	2000 to May 2	016

Severe storm winds most commonly occur as straight-line winds; a downburst of wind created by an area of significantly rain-cooled air that spreads out in all directions after hitting the ground. All jurisdictions are vulnerable to receiving damage from these severe storm winds. Historically, severe storm wind events occur about three times a year in Hamblen County. The severity of severe storm winds is commonly measured by wind speed (knots or mph). The highest severe storm wind event in Hamblen County was recorded August 4, 1997 with wind speeds clocked at 75 knots. Historically, wind impacts have largely been in the form of downed trees and powerlines in Hamblen County.

The following chart provides severe storm wind event information for Hamblen County between January 2005 and May 2016.

Freezes/Winter Storms

A freeze occurs when temperatures are below 32 degrees Fahrenheit for a period of time. These temperatures can damage agricultural crops, burst water pipes, and create layers of "black ice." Winter storms are events that can range from a few hours of moderate snow to blizzard-like circumstances that can affect driving conditions and impact communications, electricity, and other services. In Hamblen County, all jurisdictions are vulnerable to freezes and moderate winter storms, but not to the severity level seen in much of the northern U.S.

Based on previous occurrences, Hamblen County usually experiences one winter storm event every 2 years. The severity of winter storms is commonly measured by inches of snowfall. It is possible for snowfall to accumulate over 6 inches in Hamblen County. The average mean snowfall per year in Hamblen County is between 6 to 12 inches (as seen on the map below).

and a second second second statement of the second second

Winter Storm Impacts in Hamblen County: Jan. 2000 – Jan. 2017

The following chart provides winter storm event information Hamblen County between January 2000 and January 2017.

Winter Events in Hamplen County: Jan. 2000 - Jan. 20	nts in Hamblen County: Jan. 2000 – Jan. 2017	
--	--	--

Туре	Date	Impact Description
Winter Storm	1/22/2000	2 to 4 inches reported.
Winter Storm	12/02/2000	1 to 3 inches reported.
Winter Storm	12/18/2000	1 to 2 inches reported.
Winter Storm	1/1/2001	Light snow reported.
Winter Storm	1/20/2001	Around 1 inch reported.
Winter Storm	1/5/2002	2 to 4 inches reported.
Heavy Snow	1/5/2003	4 to 6 inches reported.
Winter Storm	1/16/2003	2 to 8 inches reported.
Winter Storm	1/22/2003	2 to 8 inches reported; highest amount in higher elevations.

C

Winter Storm	1/9/2004	2 to 3 inches reported.
Ice Storm /Heavy Snow	1/29/2005	1/4 to 1/2 inches of ice accumulation reported along with 4 to 8 inches of snow. Trees and power lines down.
Heavy Snow	1/29/2010	4 to 8 inches reported.
Heavy Snow	12/12/2010	4 inches reported.
Heavy Snow	1/17/2013	4 to 5 inches reported.
Heavy Snow	2/13/2014	7.2 inches reported.
Ice Storm	2/16/2015	Up to an inch of ice accumulation causing trees and power lines to go down.
Heavy Snow	2/21/2015	5 inches reported.
Heavy Snow	1/20/2016	4.3 inches reported.
Heavy Snow	1/22/2016	6 inches reported.
Heavy Snow	1/6/2017	4 inches reported

Due to the incidents that occurred on February 16 and February 21, 2015, Hamblen County had a Presidential Declaration for Public Assistance (DR-4211).

Hamblen County uses a ranking system to determine each jurisdiction's vulnerability to freezes/winter storm events. This system is based off simple arithmetic which analysis's potential impacts to determine vulnerabilities and then analysis's the probability of a freeze/winter storm event occurring to calculate a risk ranking for each jurisdiction.

		Impacts Property		Vulnerability
Hamblen County Unincorporated	2	3	2	2.33
City of Morristown	2	3	2	2.33
Hamblen County School Board	2	2	3	2.33

Jurisdiction	Vunerability	Probability	物	Risk (+P=R

Section 4: Mitigation Strategy

Mitigation Goals

The purpose for developing a set of Goals is to clearly state the community's overall vision for hazard mitigation and to provide a path towards building a safer, more resilient community. The Hamblen County Hazard Mitigation Committee identified the following goals to be the forefront in the overall development of this plan. All actions/projects recommended as mitigation efforts for the Hazard Mitigation Plan must first meet or further at least one of these goals. The goals are provided in a ranked order where the first goal is paramount.

<u>Goal 1</u>: Protect the lives and health of citizens from the effects of natural hazards.

<u>Goal 2</u>: Emphasize mitigation planning to decrease vulnerability of existing and new structures.

<u>Goal 3</u>: Encourage public support and commitment to hazard mitigation, by communicating mitigation benefits.

Identification and Prioritization of Mitigation Projects

Hamblen County has developed a comprehensive range of mitigation projects. These projects were solicited and identified by the different entities who make up the Hamblen County Hazard Mitigation Committee. Once the proposed projects attained a sponsoring agency and the details of the projects were discussed by the committee, the committee then proceeded to prioritize the mitigation projects.

The prioritization process was important since most mitigation projects represent a large investment of financial and personal resources. By evaluating each project's degree of feasibility and the level of costs versus benefits, Hamblen County was able to determine when and which projects should be implemented based on available funding and time.

The Hamblen County Hazard Mitigation Committee used the SAFE-T method to prioritize these projects. This approach was adopted from the successful methodology used by other counties in FEMA Region 4. This rating system uses five variables to evaluate the overall feasibility and appropriateness: <u>Societal</u>, <u>A</u>dministrative, <u>F</u>inancial, <u>E</u>nvironmental, and *Hamblen County Hazard Mitigation Plan October 30, 2017*

(_____

weather any concerning straight incommunity story approximate

Technical. A focus on this methodology emphasizes the use of a costbenefit review to maximize benefits.

	Project Prioritization Meth	od: SA	FE-T
- (Variable	Value	Description
S	Societal: The public must support the overall implementation strategy and specified mitigation	1	Low community priority, few societal benefits
	actions. The projects will be evaluated in terms of community acceptance and societal benefits.	2	Moderate community acceptance/priority
	community acceptance and societal benefits.	З	High community acceptance/priority
A	Administrative: The projects will be evaluated for anticipated staffing and maintenance	1	High staffing, outside needed
	requirements to determine if the jurisdiction has the personnel and administrative capabilities	2	Some staffing, help may be needed
	necessary to implement the project or whether outside help will be needed.	3	Low staffing, no outside help needed
F	Financial: The projects will be evaluated on their general cost-effectiveness and whether additional	1	Somewhat cost-effective
Ì	outside funding will be required.	2	Moderately cost-effective
		3	Very cost-effective
E	Environmental: The projects will be evaluated for any immediate or long-term environmental	1	Many environ, impacts, possibly long-term
	impacts caused by their construction or operation.	2	Some environ. Impacts, some possibly long-term
		3	Few, if any, environ. impacts
T	Technical: The projects will be evaluated on their ability to reduce losses in the long-term, whether	1	Other actions are needed or short-term fix
	there are secondary impacts, and whether the proposed project solves the associated problem or	2	Other actions may be needed for long-term fix
	if additional components are necessary.	3	Other actions not needed, long-term fix

Committee members ranked the projects as a group by determining the value for each variable and then by adding the variables rates up for a project sum value. All the project rankings can be seen on the Hamblen County Hazard Mitigation Project List.

Hamblen County Project List

The following Project List provides an overview of all the Hamblen County Hazard Mitigation Committee projects. This includes potential funding sources, implementation timeframes, the project's responsible agency, and other information. This list is to remain active and updated.

4	Did not receive any HMGP or PDM monies for this project. Not completed/ Eliminated from 2016 plan, but shown for reference.
5	Projects for Severe Weather Awareness Week include: a. 2011 – Tours of National Weather Service in Morristown b. 2012 – spoke at various schools during the week on preparedness for severe weather c. 2013 – Elementary school coloring contest on severe weather d. 2014 – Video contest with high schools on severe weather Every year tornado drills were conducted
6	Morristown Public Works and Hamblen County Road Department continues to pick up limbs after severe weather events.

National Flood Insurance Program Compliance

The National Flood Insurance Program (NFIP) is a pre-disaster flood hazard mitigation and insurance protection program which has reduced the increasing cost of disasters. The intent of the program is to: require new and substantially improved structures be designed and constructed to minimize or eliminate future flood damage; provide floodplain residents and business owners with financial insurance assistance in the form of insurance after floods; and it transfers most of the cost of private property flood losses from the taxpayers to floodplain property owners through flood insurance premiums. Participation in the NFIP is based on an agreement between communities and FEMA.

Currently Hamblen County unincorporated and the City of Morristown are NFIP participants. FEMA has listed these two jurisdictions to have a current effective map date as of 7/3/2006, with Hamblen County having its initial FIRM (flood insurance rate map) performed in 1991 and Morristown in 1978. Below are two charts that give an overview of NFIP policy and loss data for Hamblen County.

NFIP Po	licy Data for Har	mblen County (as	of 4/30/2011)
Jurisdiction	Policias in Force	Insurance In- orce	Written Etemium
Hamblen Co.	15	2,169,600	9,737
Morristown	56	11,000,000	69,318

Policies In-force: number of NFIP flood insurance policies

Insurance In-force whole \$: value of building and contents insured by the NFIP Written Premium In-force: total premiums paid for NFIP insurance policies

	NFIP Loss D	ata for Hamb	len County	(as of 4/30/2011)
Jurisdiction	Total Losses	Closed Losses	Open Losses	CWOP Losses	Total Payments
Hamblen Co.	1	1	0	0	961.81
Morristown	18	10	0	8	910,654.71

Total Losses: number of flood insurance claims filled by policyholders

Closed Losses: number of flood insurance claims paid to policyholders Open Losses: claims that are still being processed

CWOP Losses: claims that were "closed without payment"

Total Payments: total dollars paid to policyholders

According to the National Flood Insurance Program, repetitive flood loss is defined as a facility or structure that has experienced two or more insurance claims of at least \$1,000 in any given 10 year period since 1978. Within the NFIP, repetitive flood loss properties are usually considered the most vital structures to mitigate. The chart below provides

•

[

a summary of Hamblen County's only repetitive loss property as of May 2011.

	Repetitiv	Loss Pr	operties fo	or Hamblen Co	ounty	
Jurisdiction	Type of Structure	Flood	Number	Total Building Payment	Total Contents Payment	Total Paid
Morristown	Non Residnt	C	2	1,643.71	678.68	2,322.39

To continue compliance with the NFIP, the jurisdictions have identified, analyzed, and prioritized three mitigation strategies to stay active with the program.

- 1. Continue to evaluate improved standards that are proven to reduce flood damage.
- 2. Maintaining supplies of FEMA/NFIP materials to help homeowners evaluate measures to reduce damage.
- 3. Maintaining a map of areas that flood frequently and prioritizing those areas for inspection immediately following heavy rains or flooding event.

Section 5: Plan Maintenance

Monitoring, Evaluating, and Updating

The Hamblen County Hazard Mitigation Committee is designated to monitor and evaluate the mitigation plan. This committee is chaired by Hamblen County Emergency Management who leads the monitoring, evaluating, and updating process.

Monitoring activities will involve Hamblen County Emergency Management setting up a committee meeting to be held on an annual basis. Hamblen County Emergency Management will prepare a brief annual report of the meeting's findings by addressing mitigation progress and shortfalls within the county and include in plan updates.

The plan is to be evaluated annually and after any significant disaster causing human, infrastructure, and property losses. Following each annual informal evaluation of the plan by emergency management staff, any proposed revisions or recommendations will be brought before the Mitigation Committee to be incorporated into the plan. Potential updates to the plan will address changes to the hazard assessment, the critical facilities list, the repetitive loss list, the committee membership list, and the project priority list.

The plan will be formally updated every five years in accordance to 44 CFR 201.6(d)3, which states that the plan shall be reviewed, revised, and resubmitted for approval within five years to continue eligibility for HMGP grant funding. For the five year update, Hamblen County Emergency Management will notify the jurisdictional governments and the Hamblen County Hazard Mitigation Committee approximately one year prior to the plan's expiration date. The review of the plan will include updating the planning process, the hazard profiles, the risk assessment, the vulnerability assessment, the mitigation strategies, and the plan maintenance descriptions.

The five year plan update will also include soliciting other interested persons/agencies to join the Mitigation Committee and a review of what has been accomplished in the past 5 years. The Hamblen County Hazard Mitigation Committee's goal is to have meetings within this time span; dates, public notices, and objectives for these meetings will be determined by Hamblen County Emergency Management.

Five months prior to the plan's expiration date, Hamblen County Emergency Management will submit the revised plan to the Tennessee

Emergency Management Agency for preliminary review. Upon approval by the state, TEMA will submit the updated plan to FEMA for review. Once Hamblen County has attained the designation of the plan's approval pending adoption, each jurisdiction will adopt the plan through a resolution within a year.

Incorporation into Planning Mechanisms

By incorporating the Hamblen County Hazard Mitigation Plan into other planning documents and mechanisms, information contained in the mitigation plan can help fill-in missing gaps in existing documents, can contribute to already existing mitigation-based projects, and can create a strengthen stance of mitigation implementation and awareness within the county and its jurisdictions.

Some of the mechanisms that the Hamblen County Hazard Mitigation Plan could be incorporated into include:

- City of Morristown Land Use Plan
- Hamblen County Land Use Plan
- Hamblen County Building/Zoning Codes
- Hamblen County BEOP
- Hamblen County Schools Strategic Plan

The process of incorporating the hazard mitigation plan into other plans will begin during the other plan's update cycles. Hamblen County Emergency Management will first review the plans side-by-side, and where deemed necessary, Emergency Management will make notes on how mitigation concepts and actions can be incorporated into the other plans. These recommendations will be submitted to the lead agencies of the other planning mechanisms for them to place relevant information within the documents.

Additionally, in the past few years information from the original Hamblen County Hazard Mitigation Plan has been incorporated into the County's BEOP. This method of incorporation attempted to follow the described process stated above.

Continued Public Participation

The Hamblen County Mitigation Committee will strive to involve the public in future mitigation activities. This will be accomplished by continuing to post Mitigation Committee Meeting dates in the local newspaper, by attempting to have a public mitigation meeting once a year, by providing public access to copies of the Hamblen County Hazard Mitigation Plan in

the local emergency management office, and by soliciting other interested persons to participate in the mitigation planning process. By implementing these methods, the public will have an opportunity to comment on the plan during the update drafting stage and prior to plan approval.

Agenda

Hazard Mitigation Committee

October 9, 2014

2:30 PM

- Review basic components of the Hazard Mitigation Plan and why we have a County Plan – Bart Hose, Representative from TEMA Planners
- II. High Risk Flood Areas List Updated (Plan Page 6)

*Add Debbie Circle (Stubblefield Creek) *South Cumberland at Algonquin

- III. Flood Events List Update to 2013 NOAA (Plan Pages 6-7) Checked with NOAA and no update needed
- IV. Project List (Reference page 22-23 for information on how project list is determined.) ----Page 24
 Possible revisions and additions include 1) having utility lines run underground in downtown area; 2) add a hazard for "Sinkhole" on the West end of Morristown
- V. County and City Planning Departments (Page 25) No items needed updates
- VI. Severe Winter Weather Mitigation Risk/Vulnerability Analysis and Possible Project – TEMA Planner Bart Hose conducts

Revise projects list to include tree remove and replacements Additional Items not on agenda brought forth in meeting:

 Add a TDOT rep for the committee (Jay Rosen as a possible candidate)

()

- 2) Look into armoring the EOC
- 3) Discussion for money for the EOC Facility
- 4) Use CDBG for the Early Warning System for the Community

Hazard Mitigation Planning Minutes October 9, 2014 2:30 PM Fire Station 1 Training Room

The meeting was called to order and opened up by Morristown-Hamblen EMA Director, Chris Bell. Chris stated that the grant has been applied for in order for the projects that are listed on the plan to proceed to completion.

Mr. Bart Hose from TEMA gave a presentational slide on the risks/hazards on different aspects of disasters and the outcome once the clean-up has been completed. Bart confirmed with the committee members that were present on ways to adopt a plan, restructure or update an existing plan that is already in place.

Bart stressed how important it is to make sure that on the plan that is set in place to note the wording on each project and how the project (s) are going to effect the area and how it will be resolved to include the amount of time the project will take to complete in order to ensure that all grant monies are given correctly without any delays.

All grant monies that are issued out of that 15% goes to the state and incidents that are not eligible for grant monies are: Warning Systems, Generators, Repairs and/or Clean-ups, Dredging or Creek Re-routing. Any monies needed for these will come out of the agency that is responsible for these types of uses for either the City or County.

Bart stressed that at any given time we apply for grants FEMA wants point direction which means the purpose for the grant monies and the completion date, they are very strict on the usage of funds. Also before applying for grants find out what areas would be affected and address the strength of the hazard and the possible impact due to the hazard.

Chris opened the floor for discussions to see if any agency present had any concerns or issue that should be addressed so that they could be looked into. Buddy Fielder with the City of Morristown asked why Debi Circle was not included on the plan for a flood zone and needed to be added on the project list. Chris Wisecarver with MPD stated that there are two large

Charles and a second state of the second state of the second state of the second state of the second state of the

sinkholes in the Windsor Square development behind K-Mart that also needs to be addressed as well as the flood area on South Cumberland at Algonquin Street.

Gary Ryan with MFD ask about the electrical wires located on the North Side of the alley downtown because if a structural fire happened in that general area none of the fire trucks would be able to get in because of the power lines. Chris discussed this some in detail with Charles Southerland with Morristown Utility and stated that they would look into possibility having the electrical lines put underground.

Meeting was adjourned by Chris.

Hazard Mitigation Plan Meeting Minutes August 11, 2016 at 11:00 am Morristown Rescue Squad Building

In attendance: Greg Ellison, Mark Johns, Claude Smith, Charles Southerland, Daniel Singleton, Paul Brown, Clark Taylor, Tim Greene, Billy Gulley, Hugh Clement, Anthony Cavallucci, Todd Jones, Elise Hagner, Jessica Wuton, Lindsey Horn

EMA Director Chris Bell opened the meeting at 11 am.

In 2010 General Bassum of TEMA saw that TN was lacking in Hazard Mitigation plans.

Hazard mitigation grants are in smaller amounts. Money is limited. There will be a 30-40% increase because we have an active mitigation plan.

Director Bell then read from 44 CFR 201 which explains the purpose of hazard mitigation. The purpose of hazard mitigation planning is to look at the vulnerabilities we have in the area and see what we can mitigate to prevent there from being a greater impact at the time of the incident.

The first Hamblen County Hazard Mitigation Plan was finalized and approved in 2011has to be updated every five (5) years. Committee is supposed to meet every other year. Last meeting held in 2014.

Committee then reviewed each of the jurisdictions; then reviewed the vulnerabilities and hazards, both with no changes. Then the committee moved to the localized flooding areas to review. (see Hazard Mitigation Plan, page 6):

- East Morris Blvd Mitigated Lomar July 2016
- Old Russellville Pike 344
- South Cumberland at Railroad Plan is in place
- Couth Cumberland at Parker Road
- Intersection of Shinbone Road and Jarrell Rd bridge and culvert rebuilt
- South Henry at Sunrise replaced bridge
- Debi Circle spelling needs to be corrected
- Remove both East Andrew Johnson Hwy @ Larry Baker Rd and South Cumberland @ Algonquin
- Add Russellville Intermediary School
- Add Dalton Ford and Reeds Chapel Rd.

Hazards for Hamblen County: winds. hail, flooding, tornadic activity, severe weather, and winter storms – no changes.

6 Same de la secola de la s

دې اوې همه د عهم کې د کې د کې ولکې د کې د کې د د د عالم د د د ۲۰ کې د . د کې وسه د دې ولکې و

new presentation of the second statement of the

The committee then reviewed and made revisions and updatesits to projects list:

- Change timeframe on Prioroty #1 to 3-5 years
- Combine #2 and #5
- Edit #3 remove "evac routes" and change to 3-5 years
- Remove Public safe space for schools
 - Hugh Clement: We have not utilized safe space build-outs, but we do have a designated space set in our emergency plan for each school.
 - Todd Jones: Can retrofit buildings; expensive
- Tree removal on public right of way change responsibility to Public Works, TDOT, Hamblen County
- Add "Repair public property and drainage area sinkholes as affected" Jurisdiction all; new/existing infra; TDOT, Local government; 5 years

Director Bell asked if there were any more projects to add- none.

Everyone went around the table and introduced themselves

Director Bell said that he would send changes to everyone, asked they reply back with approval of changes to the Hazard Mit Plan and then at first of October they would be submitted to TEMA -> FEMA.

Meeting was adjourned.

Appendix 4

Yearly Reviews

<u>2012:</u>

1. February 2012: Conducted severe weather awareness education during Severe Weather Awareness Week.

Projects included: (Project Rank #5)

- Tornado drills in schools, government, daycares, medical centers, nursing homes, business facilities.
- Radio, TV interviews.
- Tested emergency systems.

<u>2013:</u>

- 1. Vantage view Project
 - Hazard Mitigation Grant Program [HMGP] #4060-0001 City of Morristown Drainage Improvement Project (Project Rank #1)
- 2. Updated and Revised Hamblen County Hazard Mitigation Committee (page 2)
- 3. Severe Weather Awareness Week Activities (Projects Rank #5)
 - (Same as above)
 - Presentations in 8 schools during week
 - Coloring contest

<u> 2014:</u>

- 1. Continue "Vantage View" Hazard Mitigation Program Project (Project Rank #1)
- 2. February 2014: Severe Weather Awareness Week Activities
 - Conduct Public Service Announcement video contest between two local high schools. Winning video shown on local and regional TV stations.
- 3. Committee meeting on October 9, 2014 with TEMA East planner Bart Hose on updates to hazard Mitigation Plan.

**The Hazard Mitigation Grant for the Vantage View Project was approved for Phase 1 in October 2013. But as of November 2014, the City of Morristown cancelled the contract because of "undue burden of the state and federal levels requiring continued additional forms and information to proceed with Phase II of actual construction. The FEMA approval letter and City of Morristown contact cancellation letter is shown below.

November 24, 2014

Chris Bell Director Morristown-Hamblen Emergency Management Agency 511 West Second St. Morristown, TN 37814

Director Bell,

Do to overwhelming concern for safety the City of Morristown has decided to no longer pursue the Hazard Mitigation Grant for the Vantage View Storm Water Project. The pipe failure beneath Vantage View Drive is critical. We feel should the processes and information required for the grant funding slow the bid and construction portions of the project, potential storm or geologic events will cut off this singular access to the 200 plus residents of the area. We greatly appreciate the efforts your office and those at the State and Federal level. Your assistance in making the proper notifications regarding our decision is appreciated.

We hope that the participating funding agencies will understand our position relative to our safety concerns and will continue to assist Morristown should funding be needed in the future. Thank you for serving our community.

U.S. Department of Henriked Security PEMA Region IV 3030 Chambles Tacher Read Adapta, GA 30341 FEMA

October 30, 2013

Mr. James Bassham, Director Tennessee Emergency Management Agency 3041 Sidco Drive Nashville, TN 37204-1502

Anention: Mr. Douglas Worden, State Hazard Mitigation Officer

Reference: Hazard Mitigation Grant Program (HMGP) Project 4060-0001: City of Morristown Drainage Improvement Project (Phase One)

Dear Mr. Bassham:

We are pleased to inform you that the subject project has been approved for \$69,000 with a Federal share of \$36,087 and a Non-Federal share of \$32,913. The following is the approved Scope of Work (SOW) for the above-referenced project:

The project's intent is to replace the damaged culvert and embankment. The objective is to size the culvert such that it will safely pass inflows from the watershed without increasing flood levels upstream and without increasing peak flows downstream. This will be accomplished by preparing a study of the watershed and stream to verify and/or establish the drainage area and to determine the hydrologic response (the watershed is karst in nature) as well as the hydraulic response. (Note that FEMA indicated that there is no effective model available for the stream, therefore new models will need to be created.) The City will use HEC-HMS, HEC-RAS, SWMM, and HY8 software to conduct these analyses in accordance with FEMA-accepted protocols. The current Phase I application will only include the engineering and design phase. An engineering study is needed for the benefit cost analysis to reflect correct information. Once the engineering and design phase complete that data will be used to run an accurate benefit cost analysis and then proceed with Phase II.

The Period of Performance (POP) for Phase I of this project is two (2) years from the date of this correspondence and shall end on October 30, 2015. All the activities specified in the scope of work should be completed and all Phase I deliverables submitted to FEMA no later than this date. In accordance with HMGP rules and policy, we will require the submittal of all closeout documentation, even if the project is deemed unfeasible or not cost effective, within 90 days, no later than January 28, 2016.

The City of Morristown shall deliver to FEMA through the Tennessee Emergency Management Agency for review and comment on the following project conditions:

<u> 2016:</u>

Hazard Mitigation Plan 5 Year Review and Update Minutes August 11, 2016 at 11:00 am Morristown Rescue Squad Building

In attendance: Greg Ellison, Mark Johns, Claude Smith, Charles Southerland, Daniel Singleton, Paul Brown, Clark Taylor, Tim Greene, Billy Gulley, Hugh Clement, Anthony Cavallucci, Todd Jones, Elise Hagner, Jessica Wuton, Lindsey Horn, Chris Bell

EMA Director Chris Bell opened the meeting at 11 am.

In 2010 General Bassum of TEMA saw that TN was lacking in Hazard Mitigation plans.

Hazard mitigation grants are in smaller amounts. Money is limited. There will be a 30-40% increase because we have an active mitigation plan.

Director Bell then read from 44 CFR 201 which explains the purpose of hazard mitigation. The purpose of hazard mitigation planning is to look at the vulnerabilities we have in the area and see what we can mitigate to prevent there from being a greater impact at the time of the incident.

The first Hamblen County Hazard Mitigation Plan was finalized and approved in 2011- has to be updated every five (5) years. Committee is supposed to meet every other year. Last meeting held in 2014.

Committee then reviewed each of the jurisdictions; then reviewed the vulnerabilities and hazards, both with no changes. Then the committee moved to the localized flooding areas to review. (see Hazard Mitigation Plan, page 6):

• East Morris Blvd – Mitigated Lomar July 2016

·

- Old Russellville Pike 344
- South Cumberland at Railroad Plan is in place
- Couth Cumberland at Parker Road
- Intersection of Shinbone Road and Jarrell Rd bridge and culvert rebuilt
- South Henry at Sunrise replaced bridge
- Debi Circle spelling needs to be corrected
- Remove both East Andrew Johnson Hwy @ Larry Baker Rd and South Cumberland @ Algonquin
- Add Russellville Intermediary School
- Add Dalton Ford and Reeds Chapel Rd.

Hazards for Hamblen County: winds, hail, flooding, tornadic activity, severe weather, and winter storms – no changes.

The committee then reviewed and made revisions and updatesits to projects list:

- Change timeframe on Prioroty #1 to 3-5 years
- Combine #2 and #5
- Edit #3 remove "evac routes" and change to 3-5 years
- Remove Public safe space for schools
 - Hugh Clement: We have not utilized safe space build-outs, but we do have a designated space set in our emergency plan for each school.
 - Todd Jones: Can retrofit buildings; expensive
- Tree removal on public right of way change responsibility to Public Works, TDOT, Hamblen County
- Add "Repair public property and drainage area sinkholes as affected" Jurisdiction all; new/existing infra; TDOT, Local government; 5 years

Director Bell asked if there were any more projects to add- none.

Everyone went around the table and introduced themselves

Director Bell said that he would send changes to everyone, asked they reply back with approval of changes to the Hazard Mit Plan and then at first of October they would be submitted to TEMA -> FEMA.

Meeting was adjourned.

Public Notice

3/23/2017

Print

The newspapers of **Tennessee** make public notices from their printed pages available electronically in a single database for the benefit of the public. This enhances the legislative intent of public notice - keeping a free and independent public informed about activities of their government and business activities that may affect them. Importantly, Public Notices now are in one place on the web (<u>www,PublicNoticeAds.com</u>), not scattered among thousands of government web pages.

County: Hamblen Printed In: Citizen Tribune (Morristown) Printed On: 2017/03/16

PUBLIC NOTICE

Hamblen County Multi-Hazard Mitigation Committee meeting will be held on Wednesday, March 22 at 4:00 pm at the Hamblen County Courthouse, Third Floor, Small Courtroom. The purpose of this meeting is to gather input from the public on the updated Hamblen County Multi-Hazard Mitigation Plan. This meeting is open to the public.

HAZUS: Flood

Hazus-MH: Flood Event Report

Region Name:

HamblenCo

Flood Scenario:

100 year flood

Print Date:

Friday, February 17, 2017

Disclaimer: This version of Hazus utilizes 2010 Census Data Totals only reflect data for those census tracts/blocks included in the user's study region

The estimates of social and economic impacts contained in this report were produced using Hazus loss estimation methodology software which is based on current scientific and engineering knowledge. There are uncertainties inherent in any loss estimation technique. Therefore, there may be significant differences between the modeled results contained in this report and the octual social and economic losses following a specific Flood. These results can be improved by using enhanced inventory data and flood hazard information.

.

General Description of Ontractions

Hazus is a regional multi-hazard loss estimation model that was developed by the Federal Emergency Management Agency (FEMA) and the National Institute of Building Sciences (NIBS). The primary purpose of Hazus is to provide a methodology and software application to develop multi-hazard losses at a regional scale. These loss estimates would be used primarily by local, state and regional officials to plan and stimulate efforts to reduce risks from multi-hazards and to prepare for emergency response and recovery.

The flood loss estimates provided in this report were based on a region that included 1 county(ies) from the following state(s):

_ Tennessee

Note:

Appendix A contains a complete listing of the counties contained in the region.

The geographical size of the region is 176 square miles and contains 2,321 census blocks. The region contains over 25 thousand households and has a total population of 62,544 people (2010 Census Bureau data). The distribution of population by State and County for the study region is provided in Appendix B.

There are an estimated 26,439 buildings in the region with a total building replacement value (excluding contents) of 6,481 million dollars (2010 dollars). Approximately 91.55% of the buildings (and 71.73% of the building value) are associated with residential housing.

General Building Stock

Hazus estimates that there are 26,439 buildings in the region which have an aggregate total replacement value of 6,481 million (2010 dollars). Table 1 and Table 2 present the relative distribution of the value with respect to the general occupancies by Study Region and Scenario respectively. Appendix B provides a general distribution of the building value by State and County.

Table 1	
Building Exposure by Occupancy Type for the Study	Region

Essential Facility Inventory

For essential facilities, there are 2 hospitals in the region with a total bed capacity of 278 beds. There are 23 schools, 5 fire stations, 2 police stations and no emergency operation centers.

مردمان وبوالما محرجا وتحاوصوا تحاط مالع فالعاد والعاد

General Building Stock Damage

Hazus estimates that about 10 buildings will be at least moderately damaged. This is over 67% of the total number of buildings in the scenario. There are an estimated 0 buildings that will be completely destroyed. The definition of the 'damage states' is provided in Volume 1: Chapter 5 of the Hazus Flood Technical Manual. Table 3 below summarizes the expected damage by general occupancy for the buildings in the region. Table 4 summarizes the expected damage by general building type.

Hamblen County Hazard Mitigation Plan October 30, 2017

- Construction of the second second

Before the flood analyzed in this scenario, the region had 278 hospital beds available for use. On the day of the scenario flood event, the model estimates that 278 hospital beds are available in the region.

Table 5: Expected Damage to Essential Facilities

			# Facilities	
Classification	Total	At Least Moderate	At Least Substantial	Loss of Use
	5	0	 0	0
Fire Stations		0		U
Hospitais	· · · · · · · · · · · · · · · · · · ·		n	0
Police Stations	2	U		n
Schools	23	0	<u>U</u>	

If this report displays all zeros or is blank, two possibilities can explain this.

(1) None of your facilities were flooded. This can be checked by mapping the inventory data on the depth grid.

(2) The analysis was not run. This can be tested by checking the run box on the Analysis Menu and seeing if a message box asks you to replace the existing results.

Hamblen County Hazard Mitigation Plan October 30, 2017

مست من من المراجع من المراجع ال المراجع المراجع

na sata dese opprage -

Debris Generation

Hazus estimates the amount of debris that will be generated by the flood. The model breaks debris into three general categories: 1) Finishes (dry wall, insulation, etc.), 2) Structural (wood, brick, etc.) and 3) Foundations (concrete slab, concrete block, rebar, etc.). This distinction is made because of the different types of material handling equipment required to handle the debris.

The model estimates that a total of 955 tons of debris will be generated. Of the total amount, Finishes comprises 56% of the total, Structure comprises 21% of the total. If the debris tonnage is converted into an estimated number of truckloads, it will require 38 truckloads (@25 tons/truck) to remove the debris generated by the flood.

Shelter Requirements

Hazus estimates the number of households that are expected to be displaced from their homes due to the flood and the associated potential evacuation. Hazus also estimates those displaced people that will require accommodations in temporary public shetters. The model estimates 126 households will be displaced due to the flood. Displacement includes households evacuated from within or very near to the inundated area. Of these, 56 people (out of a total population of 62,544) will seek temporary shelter in public shelters.

The total economic loss estimated for the flood is 15.87 million dollars, which represents 2.00 % of the total replacement value of the scenario buildings.

Building-Related Losses

The building losses are broken into two categories: direct building losses and business interruption losses. The direct building losses are the estimated costs to repair or replace the damage caused to the building and its contents. The business interruption losses are the losses associated with inability to operate a business because of the damage sustained during the flood. Business interruption losses also include the temporary living expenses for those people displaced from their homes because of the flood.

The total building-related losses were 15.86 million dollars. 0% of the estimated losses were related to the business interruption of the region. The residential occupancies made up 76.53% of the total loss. Table 6 below provides a summary of the losses associated with the building damage.

Date: January 18, 2018

From:

Re: Add to Regular Calendar – Compensation for Finance Director

The vote by the Personnel Committee last Friday for the finance director salary was void because there was not a quorum of the committee present.

In an effort to not delay the search for a new finance director please add the following to regular calendar under Personnel Committee:

Compensation for Finance Director

During the Finance Director search Mayor Brittain has the authority to offer a starting compensation package not to exceed \$80,000 to include base salary, education component and longevity pay.

This package is within the guidelines established by the commission approved Hamblen County Pay Plan effective July 1, 2015.

Bill Brittain, County Mayor
